OUR COMMITMENT TO SUSTAINABILITY | ESA helps a variety of public and private sector clients plan and prepare for climate change and emerging regulations that limit GHG emissions. ESA is a registered assessor with the California Climate Action Registry, a Climate Leader, and founding reporter for the Climate Registry. ESA is also a corporate member of the U.S. Green Building Council and the Business Council on Climate Change (BC3). Internally, ESA has adopted a Sustainability Vision and Policy Statement and a plan to reduce waste and energy within our operations. This document was produced using recycled paper.

SECTION 1.0

Executive Summary

Environmental Science Associates (ESA) compiled this executive summary using excerpts from the Phase I environmental site assessment report that follows. This executive summary may not provide all the information necessary to fully characterize the site and gain an understanding of the issues, nor does it detail the Phase I assessment and its findings. ESA does not recommend relying solely on this executive summary.

This Phase I environmental site assessment was conducted on behalf of a confidential client for Assessor's Parcel Number (APN) 059-300-003 (subject property), located at 222 East Shiloh Road in Sonoma County, California (see **Figure 1, Subject Property**). This assessment was conducted in general accordance with guidance from the American Society of Testing and Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13), 40 Code of Federal Regulations (CFR) Section 312.1, "Purpose, Applicability, Scope and Disclosure Obligations." This Phase I environmental site assessment was conducted to identify Recognized Environmental Conditions (RECs), Historical Recognized Environmental Conditions (HRECs), or Controlled Recognized Environmental Conditions (CRECs) at the subject property (see Section 2.1 for definitions).

A commercial government records database service searched relevant federal, State, and local regulatory agency lists for listings of the subject property assessed in this report, and for nearby properties within the appropriate ASTM 1527 standard search distances. In addition, regulatory agency websites were checked to provide additional information. The subject property did not appear on any regulatory agency lists. None of the listed sites near the subject property are considered able to affect the subject property. **The search of regulatory records did not reveal any RECs, HRECs, or CRECs.**

The subject property was inspected on July 1, 2021. The subject property consists of vineyards, one residence, one storage building, one septic system, one solar panel array, four wells, and one dry creek. There were no observations of chemical spills, underground or aboveground storage tanks, waste pits or ponds, stained soil, unusual odors, or stressed vegetation. **No RECs, HRECs, or CRECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal.**

The property owner was interviewed regarding the past and current use of the property. The information he provided was incorporated into this assessment. He stated that vineyard equipment and chemicals used for the vineyard operations are not stored on the subject property; the storage building south of the residence stores equipment and chemicals for his domestic use. The one irrigation well south of the residence is powered by propane; all other irrigation wells and the domestic well are powered by electricity. The septic system inspection reports indicate the system is functioning properly. The subject property has never had above ground or underground fuel or oil storage tanks, waste pits or lagoons, or chemical spills; and prior to his ownership, portions of the subject property were used to grow prunes and occasionally graze cattle. **No RECs, HRECs, or CRECs were reported relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal.**

SECTION 2.0

Introduction

2.1 Purpose, Standards, and Definitions

On behalf of the Confidential Client, Environmental Science Associates conducted a Phase I environmental site assessment for the 222 East Shiloh property, located in unincorporated Sonoma County just south of the Town of Windsor, California (see Figure 1).

This Phase I assessment was conducted in general accordance with the American Society of Testing Materials (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* (ASTM E1527-13) (ASTM 2013) and the U.S. Environmental Protection Agency (EPA) Final Rule regarding Standards and Practices for All Appropriate Inquiries (70 *Federal Register* [FR] 66070, November 1, 2005; 40 Code of Federal Regulations [CFR] Part 312) (AAI Rule). EPA has stated that the newly revised ASTM E1527-13 is consistent with the AAI Rule (78 FR 79319, December 30, 2013). Specifically, this final rule amends the AAI Rule at 40 CFR Part 312 to reference ASTM E1527-13 and make clear that persons conducting all appropriate inquiries may use the procedures included in this standard to comply with the AAI Rule.

The purpose of this Phase I assessment is to enable the parties relying on it to satisfy one or more of the requirements for the innocent landholder defense to liability under the Comprehensive Environmental Response, Compensation, and Liability Act and to evaluate the potential for Recognized Environmental Conditions (RECs) at the Project site. Three types of RECs are defined by ASTM E1527-13, as listed below. The term *Recognized Environmental Conditions (RECs)* means:

The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

In addition, the updated ASTM E1527-13 defines the two categories cited below.

The term *Historical Recognized Environmental Conditions (HRECs)* means:

A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release a historical recognized environmental condition, the environmental professional must determine whether the past release is a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a recognized environmental condition at the time the Phase I Environmental Site Assessment is conducted, the condition shall be included in the conclusions section of the report as a recognized environmental condition.

For a past REC to be considered an HREC, it must:

- Have already been remediated (or meet current standards without remediation);
- Not require use restrictions or engineering controls (e.g., cap, subslab depressurization system); and
- Meet current standards.

If the REC has use restrictions or engineering controls (e.g., cap, subslab depressurization system), the REC may be designated as a Controlled Recognized Environmental Condition (CREC), as defined below. Unlike HRECs, a CREC will be listed in the conclusions section of the Phase I assessment, along with other RECs. The purpose of this new category is to bring continuing obligations, such as use restrictions, maintenance requirements, and reporting requirements, to the forefront. The term *CREC* means:

A recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the environmental professional to be a controlled recognized environmental condition shall be listed in the findings section of the Phase I Environmental Site Assessment report, and as a recognized environmental condition in the conclusions section of the Phase I Environmental Site Assessment report.

RECs, HRECs, and CRECs are not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. In addition, business environmental conditions (e.g., subsurface crude oil pipelines) are noted but not considered RECs, HRECs, or CRECs.

The ASTM Standard practice also defines a “business environmental risk” as a risk that can have a material environmental impact on the planned use of a property.

2.2 Scope of Services

The following sections describe ESA's work scope:

- Section 2.0, *Introduction*, discusses the purpose for performing the Phase I assessment; the standards and definitions used for the Phase I assessment; and significant assumptions and limitations.
- Section 3.0, *Site Description*, compiles information concerning the location, legal description, and current and proposed uses of the subject property, along with a description of any structures and improvements at the time of ESA's assessment.
- Section 4.0, *Records Review*, includes ESA's review of various databases available from federal, State, and local regulatory agencies regarding hazardous materials use, storage, or disposal within or near the property considered in this assessment. Copies of relevant documents are included in the appendices of this report. Physical setting sources such as topography, soil, and groundwater conditions are described.
- Section 5.0, *Site Reconnaissance*, describes ESA's observations during reconnaissance of the subject property. The methodology used and limiting conditions are described.
- Section 6.0, *User-Provided Information*, documents information provided by the interviews conducted with the property managers.
- Section 7.0, *Findings and Opinions*, presents ESA's findings and professional opinions regarding the information contained in this report. It provides ESA's conclusions regarding the presence of RECs connected with the subject property and data gaps, if any, that could affect the recognition of RECs.
- Section 8.0, *Report Authors and Qualifications*, provides the signatures and qualifications of the report authors.
- Section 9.0, *References*, is a summary of the resources used to compile this report that supplement the information provided in the appendices.
- The appendices contain certain pertinent documentation regarding the subject property. Appendices A and B contain the report of regulatory agency database search results, as well as historical aerial photographs, historical topographic maps, and city directories. Fire insurance maps and an environmental lien search were not ordered because such records would not be produced for this rural property.

2.3 Limitations and Exceptions

No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with a property. Conformance of this Phase I assessment with ASTM E1527-13 reduces, but does not eliminate, uncertainty regarding the potential for RECs, HRECs, and CRECs in connection with the subject property. While ESA has made every effort to discover and interpret available historical and current information on the property assessed within the time available, some potential always remains for undiscovered contamination to be present. ESA's report is a best-efforts collection and interpretation of available information, and cannot be considered wholly conclusive. This report and the associated work were provided in accordance with the principles and practices generally employed by the local environmental consulting profession. This is in lieu of all warranties, expressed or implied. No other warranty is expressed or implied. ASTM E1527-13 is included in this report by reference.

This Phase I assessment is based primarily on historical research, a database review, and a site reconnaissance of accessible areas. This Phase I assessment does not include "non-scope issues" as specified by ASTM E1527-13, such as surveys for the presence of the following items on or in the vicinity of the subject property: asbestos-containing materials, polychlorinated biphenyls (PCBs), radon, effects on indoor air quality, lead-based paint, lead in drinking water, industrial hygiene, health and safety, regulatory compliance, and high-voltage lines.

The conclusions presented are professional opinions based solely upon indicated data described in this report, visual site and vicinity observations, and the interpretation of the available historical information and documents reviewed, as described in this report. Unless ESA has actual knowledge to the contrary, information obtained from interviews or provided to ESA is assumed to be correct and complete. ESA does not assume any liability for information that was misrepresented to ESA by others or for items not visible, accessible, or present on the parcel during the time of the site reconnaissance. The conclusions are intended exclusively for the purpose outlined herein and the site location and project indicated. Any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of the user.

Opinions and recommendations presented herein apply to the site conditions existing at the time of this Phase I assessment and cannot necessarily apply to site changes of which ESA is not aware and has not had the opportunity to evaluate. Changes in the conditions of the parcel may occur with time due to natural processes or the works of man on the property or adjacent properties. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond ESA's control. Opinions and judgments expressed herein are based on ESA's understanding and interpretation of current regulatory standards, and should not be construed as legal opinions.

SECTION 3.0

Site Description

3.1 General Setting and Location

The subject property is located adjacent to the southern border of the Town of Windsor and east of Highway 101 in unincorporated Sonoma County, California. Figure 1 shows the current conditions of the subject property, along with items of interest. The subject property consists of the 68.6-acre APN 059-300-003. The subject property is surrounded by Old Redwood Highway to the west, East Shiloh Road and residential properties to the north, residences to the south, and vineyards to the east. The subject property is developed with one residence, a storage building, and vineyards. **Table 3-1** summarizes the subject property acreage, and Sonoma County land use zoning and General Plan designations.

**TABLE 3-1
LOCATION AND ZONING**

Property Name	Assessor's Parcel Number	Acres	Zoning	General Plan	Structures
222 East Shiloh Road	059-300-003	68.6	Land Intensive Agriculture (LIA) with Combining Districts: B6 20, F1, F2, RC50/25, SR, VOH (see below)	Land Intensive Agriculture	One residence, one storage building, 3 water wells

ZONING:

B6 = Combining Districts = The adopted zoning maps shall specify the maximum permitted density, determined by gross acreage for all residential uses. Minimum front, side and rear yard requirements and the minimum parcel or lot size, if not otherwise specified, shall conform to the base district with which the B6 district is combined unless specifically approved otherwise by the planning commission

F1 = Floodway Combining District

F2 = Floodplain Combining District

RC50/25 = Riparian Corridor Combining District (minimum streamside conservation area shall be shown in the zoning database followed by the minimum setback for agricultural cultivation)

SR = Scenic Resources Combining District

VOH = Valley Oak Combining District

SOURCE: County of Sonoma 2021

3.2 Current Land Uses

The subject property contains vineyards and a residence.

This page intentionally left blank

SECTION 4.0

Records Review

The purpose of the records review is to obtain and examine records that could help to evaluate potential RECs, HRECs, and CRECs in connection with the subject property. This section documents the database records search and the evaluation of other records, summarizes information provided by the property owners, and describes the physical setting of the subject property.

4.1 Standard Environmental Record Sources

Federal, State, and local regulatory agencies publish databases of businesses and properties that handle hazardous materials or hazardous waste, including those properties with a known release of hazardous substances to soil and/or groundwater. These databases are available for review and/or purchase at the regulatory agencies, or the information may be obtained through a commercial database service. ESA contracted with a commercial database service to perform the government database search for listings within the appropriate ASTM standard minimum search distance (EnviroSite 2021). A detailed description of the types of information in each database reviewed and the agency responsible for compiling the data is included in the Radius Report provided as Appendix A, which includes a list of acronyms for the individual databases in the executive summary of the Radius Report.

ESA evaluated the listings with regard to the nature of potential chemicals of concern and the extent of known releases. In general, reported or potential releases likely to affect a property would include those located on or within a 1/8-mile radius of the subject property. ESA also considered additional factors such as chemical properties, regional knowledge of the site vicinity, groundwater flow direction, and available past regulatory documentation as part of the REC evaluation.

4.2 Results of Regulatory Records Search

Sites identified within the ASTM-specified search radius in the surrounding area are discussed below. The site locations are shown on maps with the records search report in Appendix A. In addition, to augment the regulatory records search, the State Water Resources Control Board (SWRCB) GeoTracker and California Department of Toxic Substances Control (DTSC) EnviroStor websites were accessed to review documents that describe the locations and status of sites with environmental issues.

The regulatory records search did not identify any listings of hazardous materials use or historical releases for the subject property.

Site 1 - Heller, Robert – The Robert Heller site is located at 445 Hembree Lane, approximately 0.3-mile to the west-southwest of the subject property. The site is a Cleanup Program Site, which was the location of a gasoline spill that was reported in August of 1989. The contaminated soil was remediated and the site was closed in September of 1989. The North Coast Regional Water Quality Control Board (RWQCB) has certified that the site was adequately remediated and does not pose a threat to people or the environment.

Site 2 - High Fire – The subject property is within 1-mile of a mapped fire hazard severity zone. There is no spill or violation associated with this site.

Site 3 - Colonial Park Inc./Colonial Park Creek Maintenance Project – The Colonial Park site is located at 5645 Old Redwood Highway, approximately 0.36-mile to the southwest of the subject property. The records list this site as a Leaking Underground Storage Tank (LUST) Site, in which a gasoline spill contaminated an aquifer that was used for drinking water. The spill was reported in January 1965. In July 1991, the site underwent remediation, which included excavating contaminated material, and the case was completed and closed in May 1997. The North Coast RWQCB has certified that the site was adequately remediated and does not pose a threat to people or the environment.

Site 4 - Sonoma County Airport Express Inc./Yolo Trucking – The Sonoma County Airport Express/Yolo Trucking site is located at 5807 Old Redwood Highway, approximately 0.36-mile to the west of the subject property.

The records list this site as a LUST Site, in which a diesel gasoline spill contaminated an aquifer that was used for drinking water. The spill was reported in January 1965. In April 1991, the site underwent remediation, which included excavating contaminated material, and was completed and closed in September 1997. The North Coast RWQCB has certified that the site was adequately remediated and does not pose a threat to people or the environment.

In 2016, California Health and Safety Code violation was issued due to failure to prepare and implement a Spill Prevention Control and Countermeasure (SPCC) Plan and a Tank Facility Statement or Business Plan; the site returned to compliance in July of 2017.

In 2019, another Health and Safety Code violation was issued for failure to complete a review and evaluation of the SPCC Plan at least once every five years and to have the plan certified by management or a professional engineer; the site returned to compliance in April of 2019.

Site 5 - Shiloh Solid Waste Disposal Site (Faught Dump) – The Shiloh Solid Waste Disposal Site (Faught Dump) is located at 5750 Faught Road, approximately 0.4-mile to the east of the subject property. The Faught Dump is a reported Land Disposal Site, which is listed as in site assessment as of June 2001 by the SWRCB GeoTracker database. Records on GeoTracker indicate that Faught Dump was a former burn dump and that the site is potentially contaminated with various waste oils (motor, hydraulic, and lubricating), although it is not clear what medium has been potentially contaminated. Given the nature of the dump site and the distance from the subject property, the former burn site is not expected to be able to affect the subject property.

Sites - 6, 8, 9, and 10 Rodgers Creek Fault – The subject property is within 1-mile of an established Earthquake Fault Zone and/or Seismic Hazard Zone, as designated by the State Geologist. There are no spills or violations associated with the fault zone.

Site 7 - Healdsburg Fault – The subject property is within 1-mile of an established Earthquake Fault Zone and/or Seismic Hazard Zone, as designated by the State Geologist. There are no spills or violations associated with the fault.

Orphan Sites – Sites not plotted due to poor or inadequate address information are referred to as “orphan sites” or “unmappable properties.” The records search identified three orphan sites:

- Buckeye Mine – The APN numbers place this mine near the far northeastern corner of Sonoma County, over 20 miles northeast of the subject property. At this distance, this mine would be unable to affect the subject property.
- SCDPW Larkfield Sewer – The Larkfield area is about one mile southeast of the subject property. At this distance, this sewer would be unable to affect the subject property.
- Standard Structures – This is a site somewhere between Shiloh Road and the Sonoma County Airport. This would place this site west of Highway 101, at least one mile west of the subject property. Given the distance, this site is not expected to be able to affect the subject property.

4.3 Other Records Reviewed

The regulatory agency records search also provides historical aerial photographs and historical topographic maps. Fire insurance maps, city directories, and an environmental lien search were not ordered because such records would not be produced for a rural property. The search results are discussed below.

Historical Aerial Photographs

Historical aerial photographs are available for the years 1952, 1953, 1956, 1957, 1968, 1971, 1972, 1974, 1975, 1979, 1983, 1985, 1987, 1993, 1998, 2005, 2009, 2010, 2012, 2014, 2016, 2018, and 2020, and are included in Appendix B. The red arrows on the aerial photographs point to the location of the current residence.

In the **1952** aerial photograph, the subject property is partly developed with orchards and partly undeveloped open grasslands and trees. The present-day property owner believes that the orchards were prunes and that cattle occasionally grazed on the subject property. The north-to-south flowing creek bisects the subject property from north-northeast to south-southwest. East Shiloh Road is present along the north side of the subject property; Redwood Highway (now called the Old Redwood Highway after Highway 101 was constructed between 1957 and 1968) is along the western border of the subject property. A few structures are present on the subject property next to Old Redwood Highway west of the creek. These structures may have been residential or agricultural support of the orchards or both. The surrounding area is orchards or undeveloped land with a few scattered structures.

The **1953 and 1956** aerial photograph shows parallel lineations on the northeast portion of the subject property, suggesting the preparation for planting additional orchards. However, the 1956 aerial photographs show that the orchard was not installed. No other significant changes are visible.

The **1957** aerial photograph shows no significant changes on the subject property or in the surrounding area.

The **1968 through 1972** aerial photographs show no significant changes to the subject property. The area across the Old Redwood Highway has some residential development.

The **1974** aerial photograph shows parallel lineations suggesting hay or weed cutting on much of the eastern portion of the subject property. Some of the planted area just east of the creek is in a pattern suggesting the orchard has been replaced with a vineyard. The property just south of the subject property appears to be the present-day trailer and RV storage yard.

The **1979 through 1985** aerial photographs are of poor quality and show no obvious significant changes to the subject property. The surrounding areas across the Old Redwood Highway shows increasing development.

The **1987 and 1993** aerial photographs show the orchard in the far northwest corner of the subject property; all other orchards, and if present vineyards, have been removed. The structures next to Old Redwood Highway appear to still be present. A residential development has been built across East Shiloh Road across from the northwest subject property corner.

The **1998** aerial photograph shows all of the previous orchards and structures have been removed, along with all trees not lining the banks of the creek. The subject property appears to have been graded, dirt roads are visible in their present-day configuration, and the linear patterns appear to be consistent with the present-day alignment of vineyard rows. Grapes may have planted at this time and were still small plants.

The **2005 through 2020** aerial photographs show the subject property in its current configuration of vineyards with one residence and one storage building. The properties north across East Shiloh Road have more residences consistent with the present-day level of development.

Historical Topographic Maps

Historical topographic maps are available for various portions of the subject property for the years 1920, 1933, 1940, 1955, 1993, 2012, 2015, and 2018, and are included in Appendix B. Note that the location of the present day residence on the subject property is identified with a red star.

The **1920** topographic map shows the subject property with orchards and the structure that was next to the property entrance on Old Redwood Highway. Old Redwood Highway and east Shiloh Road are present along the west and north boundaries, respectively. The surrounding area shows extensive agriculture and a few scattered structures.

In the **1933 and 1940** topographic maps, the creek is visible and its channel extends from the mountains to the northeast to Mark West Creek to the southwest. The structure at the Old Redwood Highway entrance to the subject property is visible.

The **1955** topographic map shows more development along the Old Redwood Highway and the present-day Highway 101 further west. The subject property has portions that are depicted as orchards and there are two structures by the property entrance. The property to the south is identified as trailer park.

The **1993** topographic map shows continuing development in the region. No changes are visible on the subject property.

The **2012 through 2018** are the more recent simplified style of topographic maps that show less detail. The creek is the only feature shown on the subject property.

City Directories

The subject property is not listed in the city directories. The city directory listings for the local area are almost all for individuals that do not indicate a specific use. The only business-specific listing is for the Chalk Hill Winery on the 1991 directory, located at 257 East Shiloh Road about 1,200 feet northeast of the subject property along the east side of the creek. The winery is not listed on the regulatory records search discussed above. This indicates that the Chalk Hill Winery has not had any known spills or chemical use violations that could affect the subject property.

4.4 Physical Setting

The following sections provide information about the physical setting of the Project Area. Geotechnical information is not a required element of ASTM E1527-13 Phase I assessments and is not included in this Phase I assessment.

Topography. The subject property is within the Healdsburg, California, 7.5-minute quadrangle. The subject property is flat other than the creek that flows from north-northeast to south-southwest across the subject property. Elevations range from about 160 feet above mean sea level at the northeast corner of the subject property to about 140 feet mean sea level at the southwest corner of the subject property where the creek exits the subject property.

Geology, Soils, and Hydrology. The surface geology consists of Quaternary¹ alluvium. The soil unit is primarily the Zomora Series silty clayey loam, which consist of moderately well drained loam (EnviroSite 2021). Loam is a mixture of sand, silt, clay, and organic material.

Flood Hazard. FEMA has designated the creek and its floodplain as flood zone designation AE, which means the area has a 1 percent chance of being equaled or exceeded in any given year (FEMA 2008). The 1 percent annual chance flood is also referred to as the base flood or 100-year flood.

¹ Quaternary time is from the present to 2.6 million years ago.

SECTION 5.0

Site Reconnaissance

5.1 Methodology and Limiting Conditions

Michael Burns, PG, CEG, CHG, from ESA conducted the site reconnaissance on July 1, 2021, to assess present conditions. Access was provided by the owner, Randy Clifton, and the realtor, Delia Nieto. Weather at the time of the site reconnaissance was sunny and clear. The site conditions discussed below are limited to readily apparent environmental conditions observed. Items of interest are shown on Figure 1.

5.2 General Site Setting

The subject property consists of one parcel split by an intermittent stream that flows north-northwest to south-southeast when flow is present; the creek was dry at the time of the site inspection. Most of the subject property consists of vineyards. One residence and one storage building are on the eastern half of the subject property. Most of the areas north and south of the subject property are in residential use. Vineyards are to the east. The Old Redwood Highway is along the western subject property border, with the corporate office of the Sonoma County Airport Express, a church, and residences on the west side of the highway. The observed conditions, along with photographs, are described below.

5.3 Site Observations

The vineyards cover most of the subject property. The vines are watered using drip irrigation. The photographs below and on the next page show typical views of the vineyards. No stained soil or stressed vegetation were observed anywhere in the vineyard areas.

The subject property has three vineyard irrigation wells shown in the photographs below. The two irrigation wells on the western part of the subject property are powered by electricity. The one irrigation well on the eastern part of the subject property is powered by propane, as shown in the bottom photograph. Minor oil staining was observed by the propane-powered well pump. The staining is minor in extent, does not extend to the edge of the pad, and is considered a de minimus condition.

The creek bisecting the subject property is shown in the photographs below. The creek banks have thick vegetation. The property owner noted that the creek only flows in the winter and is typically dry by June. No trash, stained soil, or stressed vegetation were observed.

The photographs below show the owner's residence and the domestic well located by the southeast corner of the house. The interior of the home was not inspected and is assumed to contain minor small quantities of typical home cleaning products. The domestic well is electrically powered. No stained soil or stressed vegetation was observed around the home or domestic well.

An equipment and materials storage building is located southeast of the residence and along the eastern border of the subject property. The building stores a tractor, a pickup truck, tools, irrigation materials, wine barrels, and small quantities of paints and thinners, pesticides, roofing patch tar, and chalking. No staining was observed on the floor or gravel areas.

The septic system for domestic waste is located just west of the home and is raised to provide adequate distance to groundwater. The septic system appeared to be in good working order with no sagging or wet areas, as shown below. A solar panel array is located just north of the septic system. No stained soil was observed under the transformers for the solar panel array.

The transformer on a power pole shown below has a blue “No-PCBs” sticker, meaning that the oil in the transformer does not contain polychlorinated biphenyls (PCBs).

The transformer shown below is at the entrance at the northeast corner of the subject property. No oil staining was observed on its concrete pad.

Two large-diameter metal pipes cross the creek near the center of the subject property, as shown below. However, the pipes are not connected to anything.

A driving reconnaissance of surrounding properties was conducted to look for adjacent properties that might have the potential to affect the subject property. The only property of interest is the Sonoma County Airport Express west and across Old Redwood Highway from the subject property. As shown below, this bus facility has a large above-ground diesel storage tank. The tank is in secondary containment, which would prevent spills from leaving the bus facility.

5.4 Results of Site Reconnaissance

There were no observations of chemical spills, underground or aboveground storage tanks other than the propane tank, waste pits or ponds, stained soil, unusual odors, or stressed vegetation. The propane tank is above ground and is not considered an environmental issue for future use of the subject property. The chemical use is of small quantities and no staining or stressed vegetation was observed. **No RECs, HRECs, or CRECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal.**

SECTION 6.0

User-Provided Information

Mr. Randy Clifton, the owner of the subject property since 1996, was interviewed during the site inspection on July 1, 2021. Much of the information he provided has been incorporated into the previous sections. Mr. Clifton provided the following information:

- The equipment and chemicals (e.g., fuel and oils, pesticides, and herbicides) used for the vineyard operations are not stored on the subject property. Equipment and chemicals are brought to the vineyard on an as-needed basis, and are transported back to an offsite storage facility after use.
- The storage building south of the residence stores equipment (tractor, truck, and small tools) and chemicals (small containers and quantities of fuel and oils, paints and thinners, pesticides and herbicides, and other chemicals) for his domestic use.
- The one irrigation well south of the residence is powered by propane. All other irrigation wells and the domestic well are powered by electricity.
- Sanitary waste is routed to a raised mound septic system located west of the residence. The system consists of one 1,500-gallon concrete two-compartment primary septic tank and one 800-gallon one-compartment sump tank and pump. System inspection reports, provided in Appendix B, indicate the system is functioning properly.
- The subject property has never had above ground or underground fuel or oil storage tanks, waste pits or lagoons, or chemical spills.
- Prior to his ownership, portions of the subject property were used to grow prunes. In addition, cattle occasionally grazed the subject property.

SECTION 7.0

Findings and Opinions

7.1 Findings and Opinions

A commercial government records database service searched relevant federal, State, and local regulatory agency lists for listings of the subject property assessed in this report, and for nearby properties within the appropriate ASTM 1527 standard search distances. In addition, regulatory agency websites were checked to provide additional information. The subject property did not appear on any regulatory agency lists. None of the listed sites near the subject property are considered able to affect the subject property. **The search of regulatory records did not reveal any RECs, HRECs, or CRECs.**

The subject property was inspected on July 1, 2021. The subject property consists of vineyards, one residence, one storage building, one septic tank and leach field, one solar panel array, four wells, and one dry creek. There were no observations of chemical spills, underground or aboveground storage tanks, waste pits or ponds, stained soil, unusual odors, or stressed vegetation. **No RECs, HRECs, or CRECs were observed relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal.**

The property owner was interviewed regarding the past and current use of the property. The information he provided was incorporated into this assessment. He stated that vineyard equipment and chemicals used for the vineyard operations are not stored on the subject property; the storage building south of the residence stores equipment and chemicals for his domestic use. The one irrigation well south of the residence is powered by propane; all other irrigation wells and the domestic well are powered by electricity. The septic system inspection reports indicate the system is functioning properly. The subject property has never had above ground or underground fuel or oil storage tanks, waste pits or lagoons, or chemical spills; and prior to his ownership, portions of the subject property were used to grow prunes and occasionally graze cattle. **No RECs, HRECs, or CRECs were reported relative to hazardous materials, hazardous waste, or chemical use, storage, or disposal.**

7.2 Data Gaps

ESA attempted to obtain reasonably ascertainable information regarding the subject property and the surrounding environs. There were no data gaps identified that could affect the identification of RECs, HRECs, or CRECs.

SECTION 8.0

Report Authors and Qualifications

8.1 Report Authors and Signatures

This section includes qualification statements of the environmental professionals responsible for conducting the Phase I assessment and preparing this report.

Mr. Michael Burns, PG, CEG, CHG, of ESA conducted the data review for the subject property, conducted the site reconnaissance, and prepared the Phase I environmental site assessment report. Mr. Burns has over 30 years of experience in environmental site investigations, characterizations, and assessments, including Phase I environmental site assessments.

The work conducted and the report written by Mr. Burns was reviewed by Ms. Jennifer Wade. Ms. Wade has over 12 years of experience in environmental site investigations, characterizations, and assessments, including Phase I Environmental Site Assessments.

Mr. Burns declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in 40 CFR §312.10. Ms. Wade declares that, to the best of her professional knowledge and belief, she meets the definition of Environmental Professional as defined in 40 CFR §312.10.

Mr. Burns has the specific qualifications based on education, training, and experience to assess a parcel of the nature, history, and setting of this parcel. With the assistance of Ms. Wade, he has developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

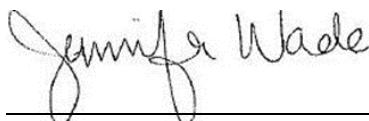

Principal Analyst/Reviewer:

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description

Source Description :

The California Environmental Protection Agency (CalEPA) has recently implemented a new data warehouse system (nSite). This data warehouse combines and merges facility and site information from five different systems managed within CalEPA. The five systems are: California Environmental Reporting System (CERS), EnviroStor, GeoTracker, California Integrated Water Quality System (CIWQS), and Toxic Release Inventory (TRI).

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSD: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

RCRA_TSD: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/25/2013	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 800-424-9346
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 10/29/2013	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 800-424-9346
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 703-603-8712
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-1667
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 202-566-1667
Planned Next Contact: 06/08/2021	Most Recent Contact: 03/12/2021

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

SEMS_DELETED NPL: All Deleted National Priority List Sties

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

FEDERAL LANDFILL AND/OR SOLID WASTE DISPOSAL SITE LISTS

EPA LF MOP: Sites in the EPA Landfill Methane Outreach Program

Agency Version Date: 04/09/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 07/06/2021	Most Recent Contact: 04/09/2021

FEDERAL ERNS LIST

ERNS: Emergency Response Notification System records of reported spills

Agency Version Date: 02/04/2021	Agency: National Response Center United States Coast Guard
Agency Update Frequency: Annually	Agency Contact: N/R
Planned Next Contact: 07/30/2021	Most Recent Contact: 05/03/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES

FED E C: Federal listing of remediation sites with engineering controls

Agency Version Date: 03/11/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 800-424-9346
Planned Next Contact: 06/07/2021	Most Recent Contact: 03/11/2021

FEDERAL INSTITUTIONAL CONTROLS / ENGINEERING CONTROLS REGISTRIES (cont.)

FED I C: Federal listing of remediation sites with institutional controls

Agency Version Date: 03/11/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 800-424-9346
Planned Next Contact: 06/07/2021	Most Recent Contact: 03/11/2021

RCRA IC_EC: Sites with institutional or engineering controls related to Resource Conservation and Recovery Act

Agency Version Date: 02/19/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 215-814-2469
Planned Next Contact: 08/16/2021	Most Recent Contact: 05/18/2021

FEDERAL RCRA GENERATORS LIST

HIST RCRA_CESQG: List of Resource Conservation and Recovery Act licensed conditionally exempt small quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 215-814-2469
Planned Next Contact: 06/08/2021	Most Recent Contact: 03/12/2021

HIST RCRA_LQG: List of Resource Conservation and Recovery Act licensed large quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 215-814-2469
Planned Next Contact: 06/08/2021	Most Recent Contact: 03/12/2021

HIST RCRA_NONGEN: List of Resource Conservation and Recovery Act licensed non-generators that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 215-814-2469
Planned Next Contact: 06/08/2021	Most Recent Contact: 03/12/2021

HIST RCRA_SQG: List of Resource Conservation and Recovery Act licensed small quantity generators that are no longer in current agency list.

Agency Version Date: 10/12/2018	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Annually	Agency Contact: 215-814-2469
Planned Next Contact: 06/08/2021	Most Recent Contact: 03/12/2021

RCRA_LQG: Resource Conservation and Recovery Act listing of licensed large quantity generators

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

RCRA_NONGEN: Resource Conservation and Recovery Act listing of licensed non-generators

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

RCRA_SQG: Resource Conservation and Recovery Act listing of licensed small quantity generators

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

FEDERAL RCRA GENERATORS LIST (cont.)

RCRA_VSQG: Resource Conservation and Recovery Act listing of licensed very small quantity generators.

Agency Version Date: 04/13/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Varies	Agency Contact: 215-814-2469
Planned Next Contact: 07/09/2021	Most Recent Contact: 04/13/2021

FEDERAL NPL SITE LIST

NPL: List of priority contaminated sites among identified releases or threatened releases of hazardous substances pollutants or contaminants nationally

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

NPL EPA R1 GIS: Geospatial data for the Environmental Protection Agency Region 1 National Priority List subject to environmental regulation

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-2132
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

NPL EPA R3 GIS: Geospatial data for the Environmental Protection Agency Region 3 National Priority List subject to environmental regulation

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-2132
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

NPL EPA R6 GIS: Geospatial data for the Environmental Protection Agency Region 6 National Priority List subject to environmental regulation

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-2132
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

NPL EPA R8 GIS: Geospatial data for the Environmental Protection Agency Region 8 National Priority List subject to environmental regulation

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-2132
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

NPL EPA R9 GIS: Geospatial data for the Environmental Protection Agency Region 9 National Priority List subject to environmental regulation

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 202-566-2132
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

PART NPL: Sites that are a part of an National Priority List site referred to as the parent site

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

FEDERAL NPL SITE LIST (cont.)

PROPOSED NPL: Sites that have been proposed for the National Priority List

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

SEMS_FINAL NPL: All Included National Priority List Sites

Agency Version Date: 02/12/2021	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: Quarterly	Agency Contact: 703-603-8867
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

Agency Update Frequency: Quarterly	Agency Contact: 916-845-8275
Planned Next Contact: 08/20/2021	Most Recent Contact: 05/25/2021

INDUSTRIAL CLEANUP_ORANGE COUNTY - CA: Petroleum and non-petroleum industrial spills

Agency Version Date: 03/01/2021	Agency: Orange County Health Care Agency
Agency Update Frequency: Annually	Agency Contact: 714-433-6000
Planned Next Contact: 06/09/2021	Most Recent Contact: 03/12/2021

SML_LOS ANGELES COUNTY - CA: Listing of all Emergency Response session spills

Agency Version Date: 05/11/2021	Agency: Los Angeles Department of Public Health
Agency Update Frequency: Quarterly	Agency Contact: 323-890-7808
Planned Next Contact: 08/05/2021	Most Recent Contact: 02/11/2021

LOCAL LAND RECORDS

LIENS 2: Comprehensive Environmental Response Compensation and Liability Act sites with liens

Agency Version Date: 05/11/2017	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: No Longer Maintained	Agency Contact: 800-424-9346
Planned Next Contact: 06/28/2021	Most Recent Contact: 04/01/2021

DEED - CA: The Department of Toxic Substances Control's listing of property locations with Deed restrictions

Agency Version Date: 05/10/2021	Agency: Department of Toxic Substances Control
Agency Update Frequency: Semi Annually	Agency Contact: 916-341-5791
Planned Next Contact: 08/05/2021	Most Recent Contact: 05/10/2021

LOCAL LAND RECORDS (cont.)

HIST LIENS - CA: The Department of Toxic Substances Control's listing of property locations with environmental liens that is no longer in current agency list.

Agency Version Date: 12/04/2018	Agency: Department of Toxic Substances Control
Agency Update Frequency: Annually	Agency Contact: 916-322-2861
Planned Next Contact: 08/17/2021	Most Recent Contact: 05/21/2021

LIENS - CA: The Department of Toxic Substances Control's listing of property locations with environmental liens

Agency Version Date: 03/25/2021	Agency: Department of Toxic Substances Control
Agency Update Frequency: Varies	Agency Contact: 916-322-2861
Planned Next Contact: 06/21/2021	Most Recent Contact: 03/25/2021

LOCAL LISTS OF LANDFILL / SOLID WASTE DISPOSAL SITES

HIST INDIAN ODI R8: List of Region 8 Indian land open dump inventory sites maintained within the STARS program that is no longer in current agency list.

Agency Version Date: 11/12/2018	Agency: Indian Health Service
Agency Update Frequency: Annually	Agency Contact: 855-246-3642
Planned Next Contact: 07/23/2021	Most Recent Contact: 04/28/2021

INDIAN ODI R8: Region 8 Indian land open dump inventory sites maintained within the STARS program

Agency Version Date: 02/12/2021	Agency: Indian Health Service
Agency Update Frequency: Varies	Agency Contact: 855-246-3642
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

ODI: Open dump inventory sites

Agency Version Date: 10/03/2017	Agency: U.S. Environmental Protection Agency
Agency Update Frequency: No Update	Agency Contact: 855-246-3642
Planned Next Contact: 08/20/2021	Most Recent Contact: 05/24/2021

TRIBAL ODI: Indian land open dump inventory for all regions

Agency Version Date: 03/10/2021	Agency: Indian Health Service
Agency Update Frequency: Varies	Agency Contact: 301-443-3593
Planned Next Contact: 08/31/2021	Most Recent Contact: 06/04/2021

HAULERS - CA: Waste Tire Manifest Program Hauler Registration listing

Agency Version Date: 01/12/2021	Agency: California Department of Resources Recycling and Recovery (CalRecycle)
Agency Update Frequency: Varies	Agency Contact: 916-341-6066
Planned Next Contact: 07/07/2021	Most Recent Contact: 04/09/2021

LF_SAN DIEGO COUNTY - CA: San Diego county landfill listing

Agency Version Date: 02/12/2021	Agency: County of San Diego Department of Environmental Health
Agency Update Frequency: Varies	Agency Contact: 858-694-2801
Planned Next Contact: 08/06/2021	Most Recent Contact: 05/11/2021

SWF_LOS ANGELES COUNTY - CA: Listing of Los Angeles County solid waste facilities

Agency Version Date: 03/15/2021	Agency: LA County Department of Public Works
Agency Update Frequency: Varies	Agency Contact: 800-320-1771
Planned Next Contact: 06/09/2021	Most Recent Contact: 03/15/2021

LOCAL LISTS OF LANDFILL / SOLID WASTE DISPOSAL SITES (cont.)

SWRCY - CA: Listing of facilities which perform recycled material processing activities

Agency Version Date: 02/26/2021
 Agency Update Frequency: Quarterly
 Planned Next Contact: 08/23/2021

Agency: California Department of Resources Recycling and Recovery (CalRecycle)
 Agency Contact: 916-341-6066
 Most Recent Contact: 05/26/2021

OTHER ASCERTAINABLE RECORDS

AFS: Air Facility Systems Quarterly Extract

Agency Version Date: 02/16/2021
 Agency Update Frequency: Quarterly
 Planned Next Contact: 08/10/2021

Agency: Environmental Protection Agency
 Agency Contact: (202) 566-1667
 Most Recent Contact: 05/14/2021

Planned Next Contact: 07/01/2021	Most Recent Contact: 04/06/2021

NFE - CA: Unconfirmed contaminated properties listing

Agency Version Date: 01/05/2021	Agency: Department of Toxic Substances Control
Agency Update Frequency: Quarterly	Agency Contact: 916-322-2861
Planned Next Contact: 06/29/2021	Most Recent Contact: 04/02/2021

NPDES - CA: Listing of facilities with wastewater and NPDES permits including stormwater

Agency Version Date: 03/12/2021	Agency: State Water Resources Control Board
Agency Update Frequency: Quarterly	Agency Contact: 916-341-5810
Planned Next Contact: 06/09/2021	Most Recent Contact: 03/12/2021

OTHER ASCERTAINABLE RECORDS (cont.)

PERCHLORATE 2 - CA: Listing of contaminated sites where the primary known chemical is perchlorate

Agency Version Date: 04/02/2021	Agency: Department of Toxic Substances Control
Agency Update Frequency: Quarterly	Agency Contact: 916-322-2861
Planned Next Contact: 06/29/2021	Most Recent Contact: 04/02/2021

PROPOSITION 65 - CA: Listing of Proposition 65 enforcement reporting notice sites in accordance with "The Safe Drinking Water and Toxic Enforcement Act of 1986"

Agency Version Date: 12/18/2020	Agency: State of California Department of Justice Office of the Attorney General
Agency Update Frequency: No update	Agency Contact: 510-873-6321
Planned Next Contact: 06/11/2021	Most Recent Contact: 03/15/2021

RFR - CA: State Water Resources Control Board Regulated Facility Report database listing which includes program agency type and their permit status

Agency Version Date: 03/19/2021	Agency: CA State Water Resources Control Board
Agency Update Frequency: Varies	Agency Contact: 916-341-5810
Planned Next Contact: 06/15/2021	Most Recent Contact: 03/19/2021

SITES INVENTORY_VENTURA COUNTY - CA: Listing of Ventura County inventory of closed illegal abandoned and inactive sites

Agency Version Date: 06/14/2019	Agency: Environmental Health Division
Agency Update Frequency: Annually	Agency Contact: 805-654-2815
Planned Next Contact: 08/11/2021	Most Recent Contact: 05/14/2021

SMU_SANTA BARBARA COUNTY - CA: Site Mitigation Unit site assessment and corrective actions at properties in Santa Barbara County

Agency Version Date: 04/15/2021	Agency: Santa Barbara County APCD
Agency Update Frequency: Varies	Agency Contact: (805) 681-4900
Planned Next Contact: 07/12/2021	Most Recent Contact: 04/15/2021

SWAT - CA: The SWAT Reports Summary Data and the Waste Management Unit Database were published by State Water Resources Control Board staff and the Regional Water Quality Control Boards for tracking and inventory of waste management units.

Agency Version Date: 08/28/2015	Agency: Department of Ecology
Agency Update Frequency: No Longer Maintained	Agency Contact: 916-322-2861
Planned Next Contact: 08/27/2021	Most Recent Contact: 06/01/2021

VCCP_VENTURA COUNTY - CA: Listing of Ventura County cleanup program sites

Agency Version Date: 01/07/2020	Agency: Environmental Health Division
Agency Update Frequency: Annually	Agency Contact: 805-654-2815
Planned Next Contact: 08/09/2021	Most Recent Contact: 05/13/2021

WDS - CA: Listing of waste discharge system reporting facilities

Agency Version Date: 02/01/2021	Agency: State Water Resources Control Board
Agency Update Frequency: Quarterly	Agency Contact: 916-341-5810
Planned Next Contact: 07/27/2021	Most Recent Contact: 04/30/2021

WILDLANDS - CA: The Wildlands Conservancy listing of preserves in California

Agency Version Date: 02/26/2021	Agency: The Wildlands Conservancy
Agency Update Frequency: Varies	Agency Contact: 909-797-8507
Planned Next Contact: 08/23/2021	Most Recent Contact: 05/26/2021

OTHER ASCERTAINABLE RECORDS (cont.)

WIP - CA: Listing of Well Investigation Program cases in the San Gabriel and San Fernando Valley area

Agency Version Date: 07/01/2009
Agency Update Frequency: Varies
Planned Next Contact: 08/17/2021

Agency: Los Angeles Water Quality Control Board
Agency Contact: 916-341-5810
Most Recent Contact: 05/21/2021

OTHER

SEISMIC - CA: Earthquake Zones of Required Investigation. Shows the location of both Seismic Hazard Zones and Earthquake Fault Zones

Agency Version Date: 03/06/2020
Agency Update Frequency: Varies
Planned Next Contact: 07/27/2021

Agency: State of California Department of Conservation
Agency Contact: 916-324-7299
Most Recent Contact: 04/30/2021

HIST PWS ENF

Historical Public Water Supply locations with Enforcement Violations

Environmental Protection Agency

(800) 426-4791

List of Safe Drinking Water Information Systems (SDWIS) with enforcement violations that are no longer in current agency list.

NWIS

National Water Information Systems

United States Geological Society

(703) 648-5953

Information on all water resources for the United States. This database contains all current and historical data for the nation.

PWS

Public Water Supply

Environmental Protection Agency

(800) 426-4791

Safe drinking water information Systems

PWS ENF

Public Water Supply locations with Enforcement Violations

Environmental Protection Agency

(800) 426-4791

Safe drinking water information Systems with enforcement violations

WELLS - GAMA - CA

California Groundwater Ambient Monitoring Assessment

State Water Resources Control Board

916-341-5791

Brings together datasets from California state agencies including: Public Health Water Resources and Pesticide Regulation as well as from the US Geological Survey Lawrence Livermore National Laboratory and the Water Boards. It shows results for untreated raw water in different types of wells for naturally-occurring and man-made chemicals.

FLOOD Q3

Flood data

Environmental Protection Agency

(202) 566-1667

Q3 Flood Data

HYDROLOGIC UNIT

Hydrologic Unit Maps

USGS

The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI

National Wetland Inventory
U.S. Fish and Wildlife Service
(703) 358-2171
Wetland Inventory for the United States

SSURGO

Detailed Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
Detailed Soil Data Map

STATSGO & MUI

General Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
General Soil Data Map

USGS GEOLOGIC AGE

USGS Digital Data Series DDS
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
USGS Digital Data Series DDS: Geologic Age and Rock Stratigraphic Unit

DAMS - CA

California Dam Inundation Maps
Department of Water Resources
916-845-8275
Dam inundation maps show the maximum extent of damage of a flood wave from a dam failure

OIL & GAS WELLS - CA

Oil and Gas Well Data
State of California Department of Conservation
916-327-1042
Oil and gas well locations and detail for all 6 districts

RADON

National Radon Database
USGS
703-605-6008
A study of the EPA/State Residential Radon Survey and the National Residential Radon Survey.

RADON - CA

Radon tested locations in California
California Department of Health Services
(916) 449-5674
A table of long term and short term indoor radon measurements

RADON EPA

RADON EPA
United States Environmental Protection Agency
EPA list of Radon zones

AIRPORT FACILITIES

Airport landing facilities

Federal Aviation Administration

(866) 835-5322

Airport landing facilities

BASINS

Better Assessment Science Integrating point & Non-point Sources

U.S. Environmental Protection Agency

855-246-3642

Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE

Obstacles of interest to aviation users

Federal Aviation Administration

855-379-6518

The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS

National Geographical Data Center

National Geographical Data Center

303-497-6826

List of recent and historic earthquakes and information.

FLOOD DFIRM

National Flood Hazard Layer Database

Federal Emergency Management Agency

The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMA's Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Information
Gatherers

HIG has produced a city directory abstract for one or more streets associated with the site location indicated above. The publications used to create the CD Abstract are listed below.

The information below is taken directly from the city directory books. The following are definitions as they are found in the Haines books:

XXXX = is no phone, no people or non-published phone.

600 XXXX = Correct address only. No other information.

X Streetname = intersecting cross street

Publication year, publisher and title

2019 Haines Marin-Sonoma Counties

2011 Haines Marin-Sonoma Counties

2006 Haines Marin-Sonoma Counties

2001 Haines Marin-Sonoma

1996 Haines Marin-Sonoma

Historical
Information
Gatherers

This Research Summary identifies the products and services provided by Historical Information Gatherers, Inc. (HIG) for the above referenced site location. All products are provided as PDFs unless otherwise noted.

City Directory Pages/Abstracts

Research Methodology: A search was conducted for city directories that include coverage of the site area using HIG's City Directory Collection and other sources, if needed. Directories for the following years were identified for the site area. A comma between date ranges indicates a gap of 10 years or more in available city directories:

SantaRosa: (1918-1935, 1957-1985, 1999)

MarinSonoma: (1972-2019)

The above listed directories were reviewed at approximate 5 year intervals to determine if the street(s) specified in the order were included in the directories and had listings for the site area. HIG attempted to identify former street names and aliases and if identified, these were also included in the review.

Research Results: City directory information, when provided, was used to create a multi-page file(s) named CD- followed by the street name. When City Directory Pages are provided, the publication name and date are shown at the top of each page. When a City Directory abstract is provided, the first page of the abstract includes the relevant publication information. The years of coverage identified for each street and any identified historical street names are as follows:

E Shiloh Road: (1972-2019)

Disclaimer & Limitation of Liability

This Research Summary and the related documents and images provided by Historical Information Gatherers (hereafter referred to as the "Site Specific HIG Data") contain information obtained from a variety of public and private sources. Additional information for the site and surrounding properties may exist. Accordingly, there can be no guaranty or warranty that the information provided is complete for its particular intended purpose. No warranty expressed or implied, is made whatsoever in connection with the Site Specific HIG Data. Historical Information Gatherers specifically disclaims the making of any such warranties, including without limitation, merchantability or fitness for a particular purpose. Historical Information Gatherers, its officers, employees and independent contractors cannot be held liable to anyone for any loss or damage, whether arising out of errors or omissions, negligence, accident or any other cause, resulting directly or indirectly from any information provided or any information not provided in the Site Specific HIG Data. Any liability on the part of Historical Information Gatherers is strictly limited to a refund equal to the amount paid for the Site Specific HIG Data.

HIG Copyright Notice

All rights reserved. The person or entity that ordered and paid for the Site Specific HIG Data is granted a personal, non-assignable, limited license to reproduce the Site Specific HIG Data solely for purposes of providing supporting documentation for reports produced for the site location which is noted on page one of this Research Summary. Any other reproduction or other use of the Site Specific HIG Data in any media or format, in whole or in part, is expressly prohibited without prior written permission from Historical Information Gatherers, and the person or entity that ordered and paid for the Site Specific HIG Data assumes all liability for the making of any such reproductions.

Licensing Agreement

The licensing agreement between Historical Information Gatherers and infoGroup provides that Historical Information Gatherers may create photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright. The licensing agreement also permits the person or entity that ordered and paid for the Site Specific HIG Data to include photocopies or reproductions of portions of Polk City Directories, Hill-Donnelley Criss-Cross Directories and other directories under infoGroup copyright as supporting documents for reports produced for the site which is the subject of the Site Specific HIG Data.

MARCH 2021 SELF-MONITORING FORM
Non-Standard System – Site Inspection Report

Site Address : 222 E SHILOH RD, SANTA ROSA
System Type: Mound

Variable Inspection: Type III
Site ID #: OPR02-3615
Gallons/Day: 480
Gal/Dose: 100
APN: 059-300-002

Owner: RANDALL & CYNTHIA CLIFTON

Please note changes of (or add if missing): Owner, Mailing Address, or Phone number adjacent to items printed below

RANDALL & CYNTHIA CLIFTON
PO BOX 1772
WINDSOR, CA 95492-1772

Please provide Permit Sonoma with your email address and best phone number if not listed:
Email: ranchclifton@gmail.com
Phone: 707-837-8854

WATCH FOR EMAIL REGARDING ONLINE DATA ENTRY FOR 2021

Recommended Maintenance & Reminders:

- Clean Sump filter annually.
- Pump septic tank every 3-5 years depending on use.
- Keep expansion areas unencumbered.
- Switch diversion valve annually, or as specified on septic plans.
- For those with pre-treatment units, please call us for a list of contractors who can service them.
- Purge and balance system every 1 to 2 years by a C42 or Engineering Contractor familiar with these systems.

Sketch a layout of your system on the back of this form (or attach a copy of the plan) & number (#) the wells. A copy of your septic plans should be available from the consultant/designer or at the County. Bulletin **WLS-014** is available at www.sonoma-county.org/prmd/docs/handouts/wls-014.pdf or call us for a mailed copy.

Please keep a copy of this site inspection to complete future forms.

Performance Well Readings: IMPORTANT-take readings in MONTH REQUESTED above

Measure from TOP of Water 'upward' to TOP of Ground (if dry, put "DRY") Well #'s below should match your attached map/plan						Control/Alarm Box Information:	Yes/No N/A
Well #	Measurement	Well #	Measurement	Well #	Measurement	Does system have a pump?	
1	DRY inches	5	DRY inches	9	inches	Audible Alarm work?	YES
2	DRY inches	6	DRY inches	10	inches	Alarm Light work?	YES
3	DRY inches	7	DRY inches	11	inches	Is there a Dose Counter	YES
4	DRY inches	8	inches	12	inches	Dose Counter advance in manual mode?	YES

Provide the information below if you have a dose counter: for dual pumps, include dose readings for both - if you have flow meter(s), provide readout (in gallons); call us as needed for guidance on the flow calculations

Today's Dose Counter Reading	4611	Today's Date	3/5/21	Number of doses divided by number of days = 0.86 doses/day. Multiply by 100 gallons per dose* for your system = 55 gallons per day (average for this specific time period). System is designed for: 480 gallons per day.
Previous reading (from your form)	4526	Date of (your) previous reading	10/1/20	
Number of doses	85	Number of days	155	

* Gallons per day and Gallons per Dose are located at the upper right corner of this form, or available from the septic plans.

Note all maintenance/repairs performed on system since last monitoring (i.e. tank pumped, purge/adjusted?) and general condition of system. If you have a diversion valve, note which field it is serving this period.

Inspection By: Randall Clifton

Date: 3/5/21

Any questions, call (707) 565-2849. **Please complete this form within the month of March 2021 and return to:** County of Sonoma Permit and Resource Management Department, 2550 Ventura Avenue, Santa Rosa, CA 95403

Date: December 28, 2020

Re: Operational Permit Inspection

System Location: 222 E Shiloh Rd

OPR#: 02-3615

Date of Inspection: October 7, 2020

Inspector Name: Thomas Haugg

Contact Information: 707-565-8351; Thomas.Haugg@Sonoma-county.org

Our office performed a routine site inspection of your nonstandard septic system as authorized by Chapter 24 of the Sonoma County Code. The purpose of this inspection is to ensure your system is operating properly for the protection of public health and groundwater resources. The inspection revealed the conditions detailed on the following page(s).

Please feel free to contact me for any questions you may have regarding this permit.

Sincerely,

Thomas Haugg
Engineering Technician II
Engineering & Water Resources Division, Permit Sonoma County
2550 Ventura Avenue, Santa Rosa CA 95403

OPR02-3615

Address: 222 E Shiloh Rd

Inspection date: October 7, 2020

1. The system appeared to be operating in an acceptable manner.
2. Thank you for updating your contact information. Please contact me or this department with any changes so we can continue to contact you in the most efficient way possible. Your email is used solely for the purpose of contacting you for future inspections or other permit related items and is never given out.
3. Thank you for being consistent in monitoring your non-standard septic system.
4. When any routine maintenance (pumping tanks, purge & balance) and/or pump/float replacement is performed, please provide more specifics and/or receipt (name of contractor, date performed, type of work, etc.). This is important in maintaining a Reduced Annual Fee Permit (RAFP) and to qualify for a level 3 RAFP. See attached list of septic contractors.
5. Note the recommended maintenance and reminders listed at the top of your self-monitoring form.
6. The diligent operation and monitoring of your nonstandard system have allowed this office to grant you a level 3 Reduced Annual Fee Permit (RAFP). You will receive an annual billing for your RAFP under a level 3 RAFP, the County will conduct a routine inspection every three years. At the County's next routine inspection, it will be determined if you will stay at or be removed from the RAFP. Please remember that the RAFP is predicated on the continued maintenance of your system and submittal of all required self-monitoring reports in a timely manner.

For further information regarding the RAFP, please see form WLS-016 'Non-Standard Septic System Reduced Annual Operational Permit Fee' on our website at <http://www.sonoma-county.org/prmd/>.

Performance Well Readings: IMPORTANT-take readings in MONTH REQUESTED above

Measure from TOP of Water 'upward' to TOP of Ground (if dry, put "DRY") Well #'s below should match your attached map/plan						Control/Alarm Box Information:	Yes/No N/A
Well #	Measurement	Well #	Measurement	Well #	Measurement	Does system have a pump?	
1	DRY inches	5	DRY inches	9	inches	Audible Alarm work?	YES
2	DRY inches	6	DRY inches	10	inches	Alarm Light work?	YES
3	DRY inches	7	DRY inches	11	inches	Is there a Dose Counter	YES
4	DRY inches	8	inches	12	inches	Dose Counter advance in manual mode?	YES

Provide the information below if you have a dose counter: for dual pumps, include dose readings for both - if you have flow meter(s), provide readout (in gallons); call us as needed for guidance on the flow calculations

Today's Dose Counter Reading	4526	Today's Date	10/1/20	Number of doses divided by number of days = 0.59 doses/day. Multiply by 480 gallons per dose* for your system = 59 gallons per day (average for this specific time period). System is designed for: 480 gallons per day.
Previous reading (from your form)	4400	Date of (your) previous reading	3/3/20	
Number of doses	126	Number of days	2.2	

* Gallons per day and Gallons per Dose are located at the upper right corner of this form, or available from the septic plans.

Note all maintenance/repairs performed on system since last monitoring (i.e. tank pumped, purge/adjusted?) and general condition of system. If you have a diversion valve, note which field it is serving this period.

3/17/20 TANK PUMPED, TANK CLEANED, FILTER CLEANED
3/30/20 SYSTEM PURGED AND BALANCED 3/30/20 FLOAT ALARM REPAIRED
AND CRACKS IN TRANSMISSION LINE REPAIRED

Inspection By: Randall Clifton

Date: 10/1/20

Any questions, call (707) 565-2849. **Please complete this form within the month of October 2020 and return to:**

Recommended Maintenance & Reminders:

- Clean Sump filter annually.
- Pump septic tank every 3-5 years depending on use.
- Keep expansion areas unencumbered.
- Switch diversion valve annually, or as specified on septic plans.
- For those with pre-treatment units, please call us for a list of contractors who can service them.
- Purge and balance system every 1 to 2 years by a C42 or Engineering Contractor familiar with these systems.

Sketch a layout of your system on the back of this form (or attach a copy of the plan) & number (#) the wells. A copy of your septic plans should be available from the consultant/designer or at the County. Bulletin WLS-014 is available at www.sonoma-county.org/prmd/docs/handouts/wls-014.pdf or call us for a mailed copy.

Please keep a copy of this site inspection to complete future forms.

Subject: Evaluation of the onsite nonstandard wastewater dispersal system at **222 Shiloh Rd. East, Windsor** on March 17, 2020

Permit History

Sonoma County Permit and Resource Management Department (PRMD) Well and Septic Division records for the above address were requested and reviewed. A four bedroom septic system permit was issued in 2002. This permit indicates the installation of a 1500 gallon primary septic tank; 800 gallon sump tank, pump and control panel; and a surface-type nonstandard Mound system. You have the permit and a full set of the original system plans for the buyer.

Septic Tanks

1. ~~A 1500 gallon concrete, two-compartment primary septic tank and 800 gallon one-~~ compartment sump tank and pump are located south of the home. All three access openings are accessible by risers and lids that are visible at surface grade. The tanks were pumped by Vineyard Septic Service (477-0556). Solids were moderate. The tanks, risers and lids, inlet baffle and primary tank outlet compartment effluent filter were in good condition.

Pump and Control Panel

2. The control panel was opened and checked. The pump and high water alarm switches in the panels were tested and are working. The pump float in the sump tank is operational. The alarm float in the sump tank is not triggering the alarm. The dose counter inside the panel was tested and is functional. For historical purposes, the dose counter reads 4412 and each dose is noted as 100 gallons. The transmission line from the pump has 2-3 leaks between the pump and its exit point in the riser wall.

Dispersal System

3. The dispersal unit is a surface type Mound system which appears to be functioning properly. There are two rectangular balancing valve boxes in the top *center* of the Mound and two rectangular purge (flush) valve boxes at each top *end* of the Mound. There are 7 round monitoring wells (MW's) in irrigation boxes. I located all 7 wells. All were dry. All of the valve boxes and MW's were easy to find as most had wooden stakes and surrounding grasses had been treated with Round-up

Replacement Area

4. There are designated replacement Mounds as shown on the plan. These future Mounds are partially located in the vineyard but with proper Mound maintenance and the potential for Mound repair vs. replacement, will likely not be used.

System Evaluation

5. The system is working at this time and it appears to be functionally sized and should have substantial remaining lifespan with proper routine maintenance as noted below.

Recommendations / Suggestions

- A. Repair or replace high water alarm float.
- B. Repair or replace the leaking pump transmission line from the pump to the point where the line exits the riser.
- C. I suggest marking most or all of the MW's and valve boxes with more permanent 4 foot high green steel "T" posts. This will continue to make them easy to locate and help avoid potential mower scalping of the box lids.
- D. As routine maintenance, the Mound system should be professionally *purged (flushed) and balanced* by a service provider *now* (owner notes it was done 3 years ago) and then approximately every couple of years. This helps keep the pressure lines cleared and the dispersal evenly distributed over the entire area of the system. At this time, the service provider can also routinely check the pumps and control panel. A list of service providers will be provided.
- E. Both tanks should be pumped regularly about every 4-6 years *as a starting point* or at least *checked* by a qualified pumper. This time interval is related to the number of people using the home on a full time basis and may be increased or decreased if use is heavier or lighter than would be expected. Hose off the effluent filter every 1-2 years. Sewage flow can be substantially reduced, and system lifespan extended, through the use of low flow toilets, showerheads and dishwashers, as well as faucet aerators and a front loading or high efficiency top loading laundry machine. Note septic tank additives are generally not needed for proper septic system function.
- ~~F. It is also important that food-related grease and oils be placed in cans or jars and disposed of in the home's solid waste container and *not* drained into the septic tank as it can lead to premature clogging of the leach field lines.~~
- G. Note that a *laundry-only* subsurface graywater system may be installed without permits; however, there are specific standards which I could discuss with you if desired.

Comments

As will be seen in the Title documents, the County of Sonoma has a legal easement to monitor the Mound system's operation. Owners pay an annual fee for an Operational Permit, and are asked to monitor the system twice a year. You can learn this from a service provider or have a service provider do it for you. Forms will eventually be sent to you (or the service provider) by the County for this purpose. After the close of escrow, I suggest the buyer or their agent contact the clerk for the Nonstandard Systems Program at 565-2658, to discuss setting up the change of owner for the Operational Permit. After two years of conscientious self-monitoring, a properly operating system may be eligible for a 1/3 to 2/3 reduction in the annual fee!

No warranty or guaranty is given or implied regarding the future function of the sewage system.

Should you have *any* questions, now or later, please contact me at 707-526-0872

Respectfully,

Mike Treinen,
California Registered Environmental Health Specialist # 3826

NOTICE: Under the Mechanics' Lien Law (California Code of Civil Procedure) any contractor, subcontractor, laborer, supplier, or other person who helps to improve your property but is not paid for his work or supplies has a right to enforce a claim against your property. This means that after a court hearing, your property could be sold by a court officer and the proceeds of sale used to satisfy your indebtedness. This can happen even if you have paid your own contractor in full, if the subcontractor, laborer, or supplier remains unpaid.

This company will not be held responsible for damage or breakage on property.
 The owner assumes all responsibility.
